

CYBERSECURITY RISK REPORT

Report ID: K-99439011 | Generated for: Test Company | Date: March 27, 2026

▪ EXECUTIVE SUMMARY

Test Company completed a NIST-based cybersecurity maturity assessment on March 27, 2026. The organization achieved an overall risk score of 42.7% (MODERATE). Several areas require improvement to strengthen the security posture. Key areas of concern include Third-Party Vendor Management and Multi-Factor Authentication (MFA). A consultation with KRAFO Systems is recommended to develop a prioritized remediation roadmap.

⚡ QUICK WINS

- Enable Multi-Factor Authentication on all business systems immediately.

🎯 STRATEGIC INITIATIVES

- Implement a comprehensive asset management and discovery program.
- Deploy a Zero Trust Architecture to enforce least-privilege access.
- Establish a Security Operations Center (SOC) or engage a managed detection service.
